

**FOR IMMEDIATE RELEASE**

## **NUGEN AUDIO TO RELEASE “ELEMENTS” VERSIONS OF ITS POPULAR FOCUS BUNDLE PLUG-INS**

*Budget-Friendly Software Proves Perfect for Small/Home Studios*

**LEEDS, UK, JANUARY 18, 2021** – In recognition of Believe in Music Week, [NUGEN Audio](#) announces that it will soon make available its “Focus Elements” solutions, which are ideally suited for small/home studios. Powered by NUGEN technology, these offerings are budget friendly, streamlined versions of the brand’s popular Focus bundle plug-ins. The first to be released to the public will be Stereoizer Elements, a stereo width plug-in that adds depth to stereo and mono mixes.

“Focus Elements bears the hallmarks of NUGEN Audio quality: providing clear, real-time visual feedback to enable rapid control choices,” says Paul Tapper, CEO, NUGEN Audio. “With our Elements plug-ins, beginner, independent and at-home producers and mixers will have access to the same powerful algorithms used in all our software via a streamlined, straightforward interface.”

Stereoizer Elements provides instant stereo enhancement with the assurance of superb mono compatibility and no unwanted artifacts. Like the traditional Stereoizer software, the Elements plug-in affords users a more coherent sound, with polish and spatial balance, to ensure a mix will sound great in both stereo and mono. Stereoizer Elements is a perfect introduction to creating a feeling of natural space or for pushing the envelope for a full, super-wide expansion of the stereo image.

The Focus Elements plug-ins are available for both Windows and Mac OS in 64-bit AAX, VST3, AU and AudioSuite formats.

NUGEN Audio Stereoizer Elements will be available for \$49 USD (+tax). Monofilter Elements and Stereoplacer Elements plug-ins are also currently in the works.
